

River-Friendly Yards

A River-Friendly Living Program: Working Together to 💙 the Truckee River

8

- Compost bins (Keeps green waste onsite. Finished compost can be added to planting beds to build healthy soil.)
- Smart irrigation controller
- Rain barrel*
- Drip irrigation for trees, scrubs, and perennials Δ
- Limited lawn areas to create defensible space near the home while conserving water
- Pick up pet waste 6

- Water-wise plants in a buffer strip betwen the sidewalk and lawn to prevent sprinkler runoff
 - Permeable paving on driveways and paths*
- Mulch in planting areas to build healthy soils, keep 9 sediments onsite, and conserve water
- Use commercial car wash, fix oil leaks, and dispose 10 of all vehicle fluids (and household chemicals) properly
 - Mini meadow (i.e. rain garden) and dry creek to capture water from downspout*
